Models- molds_ materials making the Architect	Everywhere	
Architectural DesingStudios	Professor: Department University of Thessaly	Year: None

about

Αυτή η ενότητα θεωρείτε σκόπιμο να μπει ως κεφάλαιο στο παρόν portfolio διότι οι μακέτες είναι πολύ σημαντικές για έναν αρχιτέκτονα. Καθώς τα προπλάσματα που δημιουργεί είναι κομμάτια από τις σκέψεις του κατά την δημιουργική φάση της σύνθεσης. ωστόσο είναι σημαντικό να ποθεί πως τα προπλάσματα η αλλιώς ερμηνευτικές κατασκευές του συνθέτη έχουν δημιουργηθεί από διαφορά υλικά όπως μπετόν, χαρτόνια, γύψο, εξυλλασμένη πολυστερίνη (down), ρητίνες, πλαστελίνες και έχουν κατασκευαστεί είτε από lazier cutter, 3D printing ,με καλούπια, με το χέρι καθώς και με άλλες πολυάριθμες τεχνικές, ώστε να μπορούν στο τέλος να πλαισιώνουν τις αρχιτεκτονικές ιδέες του δημιουργού.

This section should be considered appropriate to enter as capital in this portfolio because the models are very important for an architect. As the creatures he creates are pieces of his thoughts during the creative phase of composition. however, it is important to desire that the plaster or the other interpretative structures of the composer have been created by different materials such as concrete, cardboard, plaster, resins, plaster and plaster, and are manufactured either by lazier cutter, 3D printing, with hand and other numerous techniques, so that they can ultimately frame the creation of the artistic ideas of the creator.
